Wall Cladding Systems

Introduction

Wall cladding provides a durable and defensive layer designed to protect large surfaces from scuffs and scrapes, generally caused by pedestrians and movable objects such as chairs, trolleys and tables.

We offer a choice of wall cladding in a range of materials, colour options and finishes to coordinate with most interior design schemes that can be used in a range of applications.

SureProtect Endure®

Protective Wall Cladding

SureProtect Endure PVC-u sheet is textured to conceal the effects of impact and abrasion. It can be specified as a stand-alone product or be combined with other wall protection products to create a comprehensive protection system. It helps to reduce the need to repair and re-paint wall surfaces and with minimal maintenance, optimises the appearance retention of the building interior.

- Information**
- > Supplied in sheet form with the option of finishing trims, silicone sealant and thermoforming
 - > Textured PVC-u sheet available in a choice of 35 colours
 - > Reaction to fire classification
EN 13501-1: Class B Fire/s3 Smoke
See installation instructions for further information
 - > Resistance to cleaning chemicals
- SPE15N - Sheet dimensions**
- > Sheet size: 2440mm x 1220mm x 1.5mm Thickness
 - > Bespoke sizes also available

Colour Matching

Important note: Due to the limitations of the printing process, colours within this catalogue should not be relied upon for colour matching. An accurate colour match can only be achieved by requesting the relevant product sample(s).

Light Reflectance Values

All wall protection colours have been measured for Light Reflectance and the Value (LRV) is detailed below each colour (values have been measured using the CIE Y value in accordance with BS 8493:2008+A1:2010). LRVs allow tonal contrast to be achieved between different surfaces to highlight features (e.g. handrails or door furniture), identify hazards or provide wayfinding.

SureProtect Pure®

Hygienic Wall Cladding

Specifically developed for areas where cleanliness is a priority, SureProtect Pure creates an impermeable barrier to moisture and bacteria, as well as a durable solution that is resistant to impact damage. The smooth, easy to clean surface is an excellent hygienic alternative to ceramic tiles, removing the need for grout which can harbour bacteria. SureProtect Pure is manufactured from PVC-u material that has been extensively tested to ensure suitability in hygienic environments.

The product adheres to guidance set out in The Health Building Note 00-09 and the Food Standards Agency, making it the perfect solution for healthcare environments and commercial kitchens. It is also ideal for sport and leisure facilities, food manufacturing environments, pharmaceutical laboratories, dentist practices, veterinary surgeries and bathrooms.

Information

- > Smooth PVC-u sheet material in a choice of 21 colours
- > Tested for suitability in a wide range of environments
- > Range of trimming and jointing solutions
- > Reaction to fire classification
EN 13501-1: Class B Fire/s3 Smoke
See installation instructions for further information
- > Complies with ISO 22196:2011 and HBN 00-09

	WR50 Available for all Brights plus all Pastel finishes		WGA120 1-part acrylic (12kg tub)

Performance

SureProtect Pure has been extensively tested to the following standards to ensure suitability in hygienic applications.

Test	Description
Bacterial	Tested according to ISO 22196:2011
Food Contact	Meets EU Commission Regulation 10/2011 with regard to food contact
Fire	Reaction to fire classification: EN 13501-1: Class B Fire/s3 Smoke See installation instructions for further information
Impact	Tested to BS EN 438-2 that comparatively measures the impact absorption of SureProtect Pure against standard ceramic tile. The test demonstrates that SureProtect Pure PVC-u sheet can withstand significantly higher impact without damage occurring. Tested to ISO 6603-1:2000 Determination of puncture test.
Maximum temperature should not exceed temperatures of 60°C	

SureProtect Design®

Contemporary Wall Cladding

Modern and stylish in appearance, SureProtect Design elevates building interiors whilst still offering excellent surface protection. Ideal for applications where aesthetics is important such as reception areas, leisure facilities, hotel lobbies, retirement homes and university campuses.

Information

D200P Dual Rail

Features

- > PVC-u wall guard with PVC-u handrail and PVC-u accessories
- > Dual Rail provides the ideal solution where both a handrail and wall guard are required as a combined system
- > Ideal for healthcare environments where pedestrian support is required in addition to protection against severe impact
- > Reveals provide tight, neat joints and are made from a naturally bactericidal polymer that inhibits the growth of bacteria

Information

- > Supplied in 4.0m lengths
- > Accessories include reveal(s)
- > For multiple length installations use handrail splice SHR407 with wall guard splice D200JS
- > Replacement components available to purchase
- > All options are designed to meet guidelines in HBN 00-10, HBN 00-04, BS 8300-2:2018 and Approved Documents K and M
- > Wall guard and handrail available in 32 colour options

Components

D200P
PVC-u wall guard with PVC-u handrail
and PVC-u accessories

The Grange University Hospital

WST150 & WST200 Wall Strips

Features

- > Scratch and stain resistant PVC-u is through coloured and textured to conceal the effects of impact and abrasion
- > Can be used along the entire length of a wall or cut down into kickplates or pushplates
- > Ideal for protecting walls against scuffs, scratches and abrasion caused by chairs, tables, trolleys and other moveable objects
- > Available with tape for quick and easy installation, or without tape for installing with a suitable adhesive

Information

- > Supplied in 4.0m lengths
- > 32 colour options

Components

WST150N
150mm (h) no tape

WST150T
150mm (h) with tape

WST200N

WGS200 Wall Guard

Features

- > Modular system comprising PVC-u covers, aluminium or PVC-u retainers and PVC-u accessories
- > Replaceable, through coloured, easy-to-clean covers - textured to conceal the effects of impact and abrasion
- > Features an internal bumper for additional strength and to absorb and dissipate impact
- > Design ensures a tight fit to wall – minimal dust/dirt trap
- > Reveals provide neat joints and are made from a naturally bactericidal polymer that inhibits the growth of bacteria

Information

- > Supplied in 4.0m lengths
- > Replacement components available to purchase
- > Complementary corner guards available
- > 33 colour options

Components

WGS200C
continuous aluminium retainer provides rigid support and is ideal for weaker substrates

NEW
WGS200P
continuous PVC-u retainer is suitable for gently undulating substrates, made with up to 100% recycled material

WGS2001
universal end cap (including reveal)

WGS125 Wall Guard

Features

- > Modular system comprising PVC-u covers, aluminium or PVC-u retainers and PVC-u accessories
- > Replaceable, through coloured, easy-to-clean covers - textured to conceal the effects of impact and abrasion
- > Features an internal bumper for additional strength and to absorb and dissipate impact
- > Design ensures a tight fit to wall – minimal dust/dirt trap
- > Reveals provide neat joints and are made from a naturally bactericidal polymer that inhibits the growth of bacteria

Information

- > Supplied in 4.0m lengths
- > Replacement components available to purchase
- > Complementary corner guards available
- > 32 colour options

Components

WGS125C
continuous aluminium retainer provides rigid support and is ideal for weaker substrates

SHR40P Handrail

Features

- > Handrails are designed to offer pedestrian guidance and support in addition to a level of surface protection
- > Aluminium retainer with PVC-u covers and matching PVC-u accessories
- > Suitable for use in a wide range of environments including healthcare, education and transport
- > Reveals provide tight, neat joints and are made from a naturally bactericidal polymer that inhibits the growth of bacteria

Information

- > Supplied in 4.0m lengths
- > Accessories include reveal(s)
- > Replacement components available to purchase
- > Handrails feature a smooth finish in line with HBN 00-04
- > All options are designed to meet guidelines in HBN 00-10, HBN 00-04, BS 8300-2:2018 and Approved Documents K and M of The Building Regulations 2010

BHPA125 Bed Head Protector

Features

- > Fixed vertically on to walls in pairs as bed protectors or individually as chair protectors
- > Supplied as a pre-cut packaged system for ease of installation
- > Comprising PVC-u covers, aluminium retainers, PVC-u end caps and brackets
- > Reveals provide neat joints and are made from a naturally bactericidal polymer that inhibits the growth of bacteria
- > Designed to prevent damage to walls and wall mounted equipment from beds that are frequently moved around, elevated or inclined

Information

- > Supplied as part of a kit 750mm long
- > 2 units (including end caps)
- > Replacement components available to purchase
- > 32 colour options

Barrier Matting Systems

Entrance matting systems, providing an effective barrier against dirt and moisture at entrances, access points and circulation areas.

Correct specification helps to reduce slip accidents, increase the lifespan of surrounding floorcoverings and reduce cleaning and maintenance costs.

All our products are designed to ensure the correct balance between safety, performance and aesthetics and are suitable for a wide variety of contract applications.

Where to use barrier matting

An effective barrier matting system, when correctly specified, will help to minimise the risk of slip accidents caused by wet flooring and lower maintenance costs by significantly reducing the amount of dirt and moisture tracked into a building. Barrier matting can not only be used at a building's entrance and access points but also in other areas that are subject to increased risk of soiling and heavy wear. In many cases the optimum performance is achieved by combining different types of barrier matting.

The illustration below is designed to act as a guide to show some of the areas of a building that are at risk. These are divided into zones, which are referred to throughout the catalogue.

Zone 1 - Exterior Entrances & Access Points

Products:	Page	Primary Barrier Matting
Esplanade 6000	40	> Removes excess dirt prior to entering a building using a scraper wiper > Increases the effectiveness of internal primary, hybrid and secondary matting > Ideal in heavy traffic areas
Esplanade 5000	44	
Esplanade 1500	48	
Esplanade 1000	52	

Zone 2 - Interior Entrances & Access Points

Products:	Page	Primary Barrier Matting & Hybrid Barrier Matting
Esplanade 6000	40	> Removes and retains dirt and moisture to prevent ingress to adjacent floorcoverings through a combination of scraper and textile wipers > Available with a choice of wipers that offer excellent appearance retention when cleaned in accordance with Gradus recommendations > Available in a choice of open and closed construction and in different gauges to suit both recessed and surface mounted options > Available to suit varying types and volumes of traffic
Esplanade 5000	44	
Esplanade 1500	48	
Esplanade 1000	52	

Zone 4 - Other Areas

Products:	Page	Secondary Barrier Matting
Esplanade 5000	40	> Removes and retains dirt and moisture to prevent ingress to adjacent floorcoverings > Ideal for use in internal areas subject to a risk of spillage and soiling such as canteen / vending areas or breakout areas within an office environment > Products are produced from high performance fibres that are suited to intense cleaning to ensure long life appearance retention. All products carry the additional protection of a wear warranty

Zone 3 - Interior Circulation Areas and Some Interior Entrances & Access Points

Products:	Page	Secondary Barrier Matting
Esplanade 5000	44	> Removes and retains dirt and moisture to prevent ingress to adjacent floorcoverings > Often used in conjunction with Zone 2 primary and hybrid entrance mats to create additional protection for surrounding floorcoverings. Can, in some circumstances, be used as stand alone entrance barrier matting > Ideal for use in areas of heavy traffic and heavy wear such as staircases, reception areas, lift lobbies and internal entrances such as factory to office areas etc. Note: Boulevard Stripe and Boulevard 7000 are not recommended for use on staircases > Offers excellent appearance retention properties when cleaned in accordance with recommended cleaning methods. All products carry the additional protection of a wear warranty > Boulevard 6000 & Boulevard 5000 are available in a choice of sheet or tile options

Esplanade 1500	Mill finish aluminium	51																Schools, offices & high street shops	10 Years
Esplanade 1000	Mill finish aluminium	55																Schools, offices & high street shops	5 Years

Notes:

¹ All primary entrance barrier mats are independently tested to the weights specified using a four wheeled trolley with fixed 150 × 45mm hard rubber wheels to a minimum of 30,000 passes. eg 250kg per wheel = 1000kg over 4 wheels

² Manufacturing and material defects warranty. Warranty is subject to type of application, installation and on-going cleaning & maintenance being in accordance with recommendations. Additional terms & conditions apply - details available upon request.

³ Typical applications are a guide only. Attention should be paid to the performance characteristics of each mat type in conjunction with an assessment of the requirements of the particular application.

⁴ Anodised finishes provide an aesthetic solution and may help reduce visual distortion when used in brightly lit areas and / or glass atriums.

Esplanade 6000

Primary Barrier Matting

UPDATED

Esplanade 6000 is made with an aluminium base and wipers connected by pvc linking strips. The wipers come in pvc for exterior use or Boulevard 6000 textile wipers for interior use, made from 100% recycled ECONYL® solution dyed nylon yarn in eight colours. The aluminium base is supported by pvc bridging strips for extra strength and come in various finishes: mill finish for interior and exterior use and bronze anodised for interior use. It can also be used with Boulevard 6000 secondary barrier matting.

- Zones 1 & 2**
- > Exterior & Interior Entrances & Access Points
- Typical applications**
- > Large hospitals, offices, schools & department stores

Esplanade 6000 : Closed Construction

Closed construction - dirt and moisture remain on the surface of the mat and can be removed by regular cleaning in addition to periodic deep cleaning of the mat itself.

- Typical example:
- > Closed construction
 - > 12mm aluminium base
 - > Pvc wiper

- Typical example:
- > Closed construction
 - > 18mm dark bronze anodised base
 - > Boulevard 6000 Copper wiper

Transition Profiles - Clip-Top™

Clip-Top trims provide a neat, safe transition between Boulevard secondary barrier matting and floorcoverings of the same or different heights. This two-piece product comprises PVC-u tops, which can be replaced so that the colour can be altered as part of a refurbishment programme, or if a worn or damaged section needs to be changed, without renewing the base or disrupting the fitted floorcovering.

Available in a choice of colours to suit most interior design schemes. A selection of Clip-Top products are shown below.

RT52/AFT28 linoleum to Boulevard 6000 barrier matting. Note: AFT28 fitted on top of the linoleum.
